## Profile

A front-end developer who enjoys creating innovative websites and applications that helps create positive impact and makes life simpler. A dedicated worker with a love for web development and knowledge of web design. I've developed multiple websites and applications using HTML, CSS, JavaScript, React, and TypeScript.

## Experience

### Network Analyst Intern, Bharat Sanchar Nigam Limited, Visakhapatnam

APRIL 2017 — JULY 2017

• Participated in a team project to upgrade routers and switches in order to support the transition from older TDM  technology to IP networking.

• Under the supervision of a Senior Engineer, managed the Cisco Unified Communication  (Voice).

• Assisting with the installation and troubleshooting of network devices such as routers, switches, desktop and printer issues, and Network and Server support issues, as well as Network Documentation (Using Visio).

• Verified the incident data provided by the end customer was accurate.

## Education

### Maters of Engineering, Electrical and Computer, Concordia University, Montréal

SEPTEMBER 2019 — AUGUST 2021

• Acquired front-end skills such as HTML , CSS, Javascript, React, React Hooks, Redux and Typescript.

• Acquired back-end skills such as Node, Express, MySQL and MongoDB.

• Deployed website using Firebase, Github and Heroku.

## Courses

### The Complete Web Development Bootcamp

AUGUST 2021 — NOVEMBER 2021

## Works

### Amazon Clone App

• Developed Amazon clone with all the basic functionalities such as adding item to basket, remove from basket, displaying total price and payment using React, Redux, React Hooks,Firebase.

• Visit the site at "https://final-264f1.web.app//" .

### Netflix Clone App

• Developed a Netflix Clone with the help of TMDB (The Movie Database) API using React,  React Hooks and Firebase for hosting.

• Visit the site at "https://netflix-clone-ec2b2.web.app/".

### Personal Portfolio
